Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

About the editors xi

Preface xiii

1. Renewable and clean energy systems based on advanced nanomaterials, basics, and developments

Sahar Zinatloo-Ajabshir and Ardashir Mohammadzadeh

References 8

2. Advanced nanomaterials for perovskite based solar cells

Hakimeh Teymourinia, Melika Mohsenpour Tehrani and Ali Ramazani

- 2.1 General introduction 11
- 2.2 Metal oxide nanoparticles 12
- 2.3 Carbon nanomaterials 21
- 2.4 Quantum dots 24
- 2.5 Other advanced nanomaterials 25
- 2.6 Conclusion and outlook 28

Nomenclature 28

References 29

3. Advanced nanomaterials for dye sensitized solar cells

Hakimeh Teymourinia and Vahid Amani

- 3.1 General introduction 41
 - 3.2 Structure of dye-sensitized solar cell 42
 - 3.3 Nanomaterials usage in dye-sensitized solar cells 43
 - 3.4 Conclusion and outlook 59
- References 60

4. Mixed metal oxide-based nanomaterials for hydrogen storage

Maryam Ghiyasiyan-Arani

- 4.1 General introduction 69
 - 4.2 Electrochemical hydrogen storage 70
 - 4.3 Hydrogen storage mechanism 72
 - 4.4 Materials 79
 - 4.5 Conclusion and outlook 89
- References 91

5. Graphitic carbon nitride/graphene-based nanomaterials for hydrogen storage

Zahra Fakharshakeri and Hossein Safardoust-Hojaghan

- 5.1 General introduction 99
 - 5.2 Graphene-based material 100
 - 5.3 Graphitic carbon nitride 111
 - 5.4 Graphene/graphitic carbon nitride for hydrogen storage 117
 - 5.5 Conclusion and outlook 117
- References 118

6. Active nanomaterials for Li-ion batteries and advanced nanomaterials for supercapacitors

Maryam Ghiyasiyan-Arani

- 6.1 General introduction 125
 - 6.2 Active materials: nanostructuring versus microstructuring 126
 - 6.3 Morphology controlling 128
 - 6.4 Advanced electrode materials 137
 - 6.5 Conclusion and outlook 144
- References 145

7. Basics of photovoltaic panels and an overview of the use of solar energy in the world

Mai The Vu, Shijie Li, Mohammad Hosein Sabzalian, Khalid A. Alattas, Ardashir Mohammadzadeh and Chunwei Zhang

- 7.1 Introduction 155
- 7.2 Brief history of using the sun as an energy source 157
- 7.3 Introducing photovoltaic systems 159
- 7.4 The basics of photovoltaic panels 167
- References 180

8. The efficiency of solar panels and power control

Mai The Vu, Tianpeng Li, Mohammad Hosein Sabzalian, Khalid A. Alattas, Nasreen Kausar, Ardashir Mohammadzadeh and Chunwei Zhang

- 8.1 Introduction 183
- 8.2 Solar panel modeling 184
- 8.3 Battery modeling 186
- 8.4 Converter modeling 186
- 8.5 Optimal operating point tracking algorithms 187
- 8.6 Control design 189
- 8.7 Examples of solar energy deployment 194
- 8.8 Household power plants 205
- References 217

9. The physics of sunlight and cells

Zilong Li, Mohammad Hosein Sabzalian, Mai The Vu, Khalid A. Alattas, Ardashir Mohammadzadeh and Chunwei Zhang

- 9.1 Introduction 219
- 9.2 The sun 219
- References 243

10. The different methods of using solar energy

Tianpeng Li, Khalid A. Alattas, Mohammad Hosein Sabzalian, Jinping Liu, Ardashir Mohammadzadeh and Chunwei Zhang

- 10.1 Introduction 245
- 10.2 Dye-sensitized solar cells 245
- 10.3 Organic solar cells 247
- 10.4 Technical discussions 263
- 10.5 Feasibility in Middle East 263

- 10.6 The components of floating photovoltaic power plants 264
- 10.7 Evaluating the photovoltaic power plant installed at sea 265
- 10.8 Using the photovoltaic system for water treatment 266
- 10.9 Treatment system mechanisms 266
- 10.10 Different water treatment technologies 267
- References 270

11. Financial analysis of solar energy

Tianpeng Li, Khalid A. Alattas, Mohammad Hosein Sabzalian, Kamran Sabahi, Chunwei Zhang and Ardashir Mohammadzadeh

- 11.1 Introduction 273
- 11.2 Reducing costs in manufacturing system components 274
- 11.3 Reducing cost in sales and distribution of system component 282
- 11.4 Reducing installation and repair costs 283
- 11.5 Improving the efficiency of financial systems and programs 288
- 11.6 Improving equipment performance and correcting amplifier characteristics 292
- 11.7 Easing access and internal connectivity 295
- 11.8 Methods of calculating cost savings 296
- 11.9 Silicon cost 296
- 11.10 Nonsilicon cost 296
- 11.11 Variable costs based on the scale of power plant 297
- 11.12 The final cost equation 297
- References 298

12. Photovoltaic project design in software

Tianpeng Li, Mohammad Hosein Sabzalian, Mai The Vu, Khalid A. Alattas, Ardashir Mohammadzadeh and Chunwei Zhang

- 12.1 Introduction 301
- 12.2 Introduction to software 306
- 12.3 Complete analysis of a sample project 307
- 12.4 Developing a photovoltaic project in software 310
- 12.5 Project definition 324
- 12.6 Saving project 324
- 12.7 More options 327
- 12.8 Electrical effects: separating module array 330
- References 333

13. Frequency adjustment in solar systems: how to check and determine the location of solar panels	
Shijie Li, Mohammad Hosein Sabzalian, Khalid A. Alattas, Hamid Taghavifar, Kamran Sabahi, Jinping Liu, Ardashir Mohammadzadeh and Chunwei Zhang	
13.1 Introduction	335
13.2 An overview of site selection	336
13.3 Evaluation criteria	336
13.4 Multicriteria decision making	338
13.5 Site determination criteria	338
13.6 Limitations of site determination	339
13.7 Environmental and social considerations	346
13.8 Capacity	347
13.9 Access and right of way	347
13.10 Equipment contamination	348
13.11 Frequency adjustment in solar systems	358
References	365
Further reading	366
Index	367

List of contributors

- Khalid A. Alattas** Department of Computer Science and Artificial Intelligence, College of Computer Science and Engineering, University of Jeddah, Jeddah, Saudi Arabia
- Vahid Amani** Department of Chemistry Education, Farhangian University, Tehran, Iran
- Zahra Fakharshakeri** Institute of Nano Science and Nano Technology, University of Kashan, Kashan, Iran
- Maryam Ghiyasiyan-Arani** Institute of Nano Science and Nano Technology, University of Kashan, Kashan, Iran
- Nasreen Kausar** Department of Mathematics, Yildiz Technical University, Istanbul, Turkey
- Shijie Li** Multidisciplinary Center for Infrastructure Engineering, Shenyang University of Technology, Shenyang, P.R. China
- Tianpeng Li** Multidisciplinary Center for Infrastructure Engineering, Shenyang University of Technology, Shenyang, P.R. China
- Zilong Li** Multidisciplinary Center for Infrastructure Engineering, Shenyang University of Technology, Shenyang, P.R. China
- Jinping Liu** Department of Software Engineering, College of Information Science and Engineering, Hunan Normal University, Changsha, Hunan, P.R. China
- Ardashir Mohammadzadeh** Multidisciplinary Center for Infrastructure Engineering, Shenyang University of Technology, Shenyang, P.R. China
- Ali Ramazani** Department of Science, University of Zanjan, Zanjan, Iran
- Kamran Sabahi** Department of Engineering Science, Faculty of Advanced Technologies, University of Mohaghegh Ardabili, Namin, Iran
- Mohammad Hosein Sabzalian** Department of Mechanical Engineering, Faculty of Engineering, University of Santiago of Chile (USACH), Santiago, Chile
- Hossein Safardoust-Hojaghan** Institute of Nano Science and Nano Technology, University of Kashan, Kashan, Iran
- Hamid Taghavifar** Department of Mechanical, Industrial and Aerospace Engineering, Concordia University, Montreal, Quebec, Canada
- Melika Mohsenpour Tehrani** Department of Polymer Chemistry and Materials, Faculty of Chemistry and Petroleum Sciences, Shahid Beheshti University, Tehran, Iran
- Hakimeh Teymourinia** Department of Chemistry Education, Farhangian University, Tehran, Iran; Department of Science, University of Zanjan, Zanjan, Iran
- Mai The Vu** Department of Artificial Intelligence and Robotics, Sejong University, Seoul, Republic of Korea
- Chunwei Zhang** Multidisciplinary Center for Infrastructure Engineering, Shenyang University of Technology, Shenyang, P.R. China
- Sahar Zinatloo-Ajabshir** Department of Chemical Engineering, University of Bonab, Bonab, Iran
